

LAKE WYOLA WATERSHED FIELD VISIT

with FRCOG staff

Saturday, August 12th
1 PM

Meet at Association Hall
6 Shore Drive, Shutesbury

Visit will be a mix of walking and driving

WE WANT TO HEAR AND SEE YOUR CONCERNS ABOUT WATER QUALITY AND STORMWATER MANAGEMENT IN AND AROUND THE LAKE!

Staff at the Franklin Regional Council of Governments (FRCOG) have been developing a watershed-based plan for Lake Wyola.

The draft plan summarizes previous studies and projects completed for Lake Wyola, describes water quality issues and other community concerns, and includes recommendations for additional studies and best management practices with the goal of protecting and improving the lake's water quality and the health of its watershed.

With an approved watershed-based plan, Shutesbury will be eligible for MassDEP grants that fund further assessment and project implementation.

To view a public-review copy of the Watershed-Based Plan or June 6, 2023 presentation to the Select Board, visit <https://www.shutesbury.org/news/watershed-based-plan-lake-Wyola>.
