

As of March 26:

1 case in isolation

4 contacts in quarantine

Dear Shutesbury residents,

The vaccine supply is increasing and many people are being vaccinated daily. Remember that the vaccine takes full effect about fourteen days after the final injection, whether you have one or two. Once you reach that happy day, don't go hog wild! You will be able to gather unmasked with a small number of fully vaccinated adults, and to socialize with one other household in which there are unvaccinated individuals. Otherwise please continue to observe the usual precautions.

If you want more information about vaccination and the vaccines themselves, you can join an on-line forum presented by LifePath and the Franklin Regional Council of Governments, Tuesday, March 30, at 5:00 p.m: "What you need to know about the COVID-19 vaccines." To view the flyer for this event, with instructions on how to connect, visit shutesbury.org/pandemic-information
